Final Budget Report (Q4 2023)

End of Fiscal Year Target: 100% Utilization of Approved Budget (allotment)

Low Utilization (32%): Significant under-spending suggests major project or facility delays.

Moderate Spending (63% - 65%): These gaps often indicate "hiring lag," where salary funds remain unspent due to vacancies.

The Bottom Line: The 100% utilization target for fiscal year (Oct, 1 2022 -Sept, 30,2023) was not met. This represents significant resources provided by Congress that went unutilized by the end of Q4.

Goal for Next Fiscal Year: Implement **Quarterly Budget Audits** to ensure spending is on track to reach 100% utilization by the Q4 deadline.
